SUPPLEMENTAL STATEMENT OF FACTS IN SUPPORT OF FILING
ON BEHALF OF NON-SIGNING INVENTOR (37 C.F.R. § 1.47)

This supplemental statement together with the October 29, 2007 statement is made as to the facts that are relied upon to establish the diligent effort made to secure the execution of the declaration by the non-signing inventor for the above-identified patent application. This supplemental statement is being made by the available person having first-hand knowledge of the facts recited herein.

Last Known Address of the Non-signing Inventor

Tristan Richard Ghislain Davenne

Full Name of Non-signing Inventor

15 Chapel Road, Epping, Essex, CM16 5DS, United Kingdom

Last Known Address of Non-signing Inventor

Details of Efforts to Reach Non-signing Inventor

On February 5, 2008, I sent Mr. Davenne the attached letter dated February 5, 2008 which was sent to him by courier (i.e. DHL No. 8649503052) together with a copy of patent application serial number 10/594,260, filed September 25, 2006, entitled Gear Assembly. Also enclosed with the letter were an inventor's Declaration form *listing the correct inventive entity*, an Assignment form, and a Power of Attorney form for his review and execution. A copy of the February 5, 2008 letter, patent application, and forms as sent to Mr. Davenne are attached. I sent the letter to Mr. Davenne's last known address at the time. Thereafter I learned that "Davenne" signed for the package and that the shipment was delivered as evidenced by the attached tracking history for DHL No. 8649503052, the entries entitled "Signed for by" and "2/7/2008 10:17 am."

On March 5, 2008, I sent Mr. Davenne the attached follow-up letter dated March 5, 2008 which was sent to him by courier (i.e. DHL No. 8649503133). The March 5, 2008 correspondence included a copy of the letter, patent application, and forms as sent to Mr. Davenne on February 5, 2008 (*See attached March 5, 2008 correspondence*). The March 5, 2008 letter requested Mr. Davenne to contact me at his earliest convenience. Thereafter I learned that "Davenne" signed for the package and that the shipment was delivered as evidenced by the attached tracking history for DHL No. 8649503133, the entries entitled "Signed for by" and "3/26/08 10:07 am." Neither my office nor I ever received from Mr. Davenne a response to my letter or the executed application papers.

On May 16, 2008, I sent Mr. Davenne the attached follow-up letter dated May 15, 2008 which was sent to him by courier (i.e. DHL No. 8645994280). The May 16, 2008 correspondence included a copy of the letter, patent application, and forms as sent to Mr.

Davenne on March 5, 2008 (*See* attached May 16, 2008 correspondence). The May 15, 2008 letter requested Mr. Davenne to contact me as soon as possible. According to the attached tracking history for DHL No. 8645994280, as of June 6, 2008, the package was unable to be delivered after repeated attempts by DHL to deliver the package to Mr. Davenne.

Details of Refusal of Non-signing Inventor to Sign Application Papers

Despite my above-mentioned attempts to contact Mr. Davenne, and the previous attempts by myself and my colleagues to contact Mr. Davenne as detailed in the October 29, 2007 statement of facts, I have never received any communication from Mr. Davenne and, more particularly, nor have I ever received the executed application papers. Accordingly, in view of the above-mentioned facts, together with the October 29, 2007 statement of facts, Mr. Davenne has refused to sign the declaration and thereby join in the application.

RE: U.S. Patent Application No. 10/594,260
Filing Date: September 25, 2006
Title: GEAR ASSEMBLY
Dkt. No. M04B101

Dear Mr. Davenne:

In following up with you, once again, regarding my correspondence of October 9, 2007, it has come to my attention that a page of the Declaration mailed to you on October 9th was inadvertently not included.

Accordingly, enclosed please find a copy of the above-referenced patent application for the invention of which you are a co-inventor. Also enclosed for your execution is (a) a complete inventor's Declaration to be signed (and dated) by you in blue ink; (b) an Assignment which you should sign on the same date that you sign (and date) the Declaration; and (c) a Power of Attorney and Correspondence Address Indication Form which you should also please sign and date.

Please review the application carefully and make sure that you agree with its contents prior to executing the Declaration.

If there are no changes to be made, please read the Declaration carefully, paying particular attention to the fact that, by signing the Declaration, you acknowledge the following:

- a) To the best of your knowledge, you are the first and true inventor of the subject matter of the patent application.
- b) You owe the highest duty of candor and good faith in your dealings with the Patent and Trademark Office, and in discharge of this duty, you must disclose to the Patent and Trademark Office any information of which you are aware that is "material to examination of this application" as defined in the attached 37 CFR § 1.56. Such information is material when, at least in part, there is a substantial likelihood that a patent examiner would consider it important in deciding whether the subject matter of the present application is patentable.

After these steps have been taken, please sign (and date) the Declaration.

The Assignment should be signed by you and witnessed at the same time that you sign and date the Declaration.

The Power of Attorney and Correspondence Address Indication Form should be signed and dated by you.

Please return the application copy with the signed Declaration, signed Assignment and signed Power of Attorney. The extra copy of the application is for your records.

Mr. Tristan Richard Ghislain Davenne
February 5, 2008

I look forward to receiving these papers as soon as possible. Indeed, please send me an e-mail regarding when the papers can be expected.

On behalf of Edwards Vacuum, Inc., thank you once again for your submittal of the above-referenced invention record on which the patent application is based. If you have any concerns or questions, please do not hesitate to contact me.

§ 1.56 DUTY TO DISCLOSE INFORMATION MATERIAL TO PATENTABILITY. (Added 3/16/92)

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information from consideration need not be of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine: (Added 3/16/92)

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and (Added 3/16/92)
 - (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentability defines, to make sure that any material information contained therein is disclosed to the Office. (Added 3/16/92)

Dear Mr. Davenne:

On February 5, 2008 a letter was mailed to you that requested your review and execution of a Declaration form, a Power of Attorney form and an Assignment contract relating to the above-referenced patent application. A further copy of this letter and the documents for execution are enclosed.

We note that the DHL record (i.e. DHL No. 8649503052) concerning shipment of these documents was signed for by "Davenne" on February 7, 2008. To date, we have received neither an e-mail nor the executed documents nor any communication from you whatsoever. Once again, please contact me at your earliest convenience, but by no later than **March 10, 2008**, regarding when we can expect to receive the executed documents.

Note that we have made diligent efforts to secure your review and execution of the Declaration, Power of Attorney and Assignment documents.

On August 30, 2007, a letter regarding the above-referenced patent application was sent to your last known address at the time. Thereafter, we learned that you had moved as shown in the enclosed tracking history for DHL No. 7407809743, the entry entitled "9/3/2007 10:18 am."

On September 25, 2007, we obtained a more recent address for you and on October 9, 2007 sent to your new address, another letter dated October 9, 2007 regarding the above-referenced patent application. Thereafter we learned that the shipment was received and signed for by "Davenne" as shown in the enclosed tracking history for DHL No. 7407809953, the entries entitled "Signed for by" and "10/11/2007 10:46 am."

In yet another attempt to communicate with you, we sent a follow-up letter dated October 22, 2007 which was received and signed for by "Davenne" as shown in the enclosed tracking history for DHL No. 740789032, the entries entitled "Signed for by" and "10/24/2007 11:12 am."

On February 5, 2008 we mailed to you, once again, a letter together with a complete set of the formal documents for your review and execution. The February 5, 2008 letter was received and signed for by "Davenne" as shown in the enclosed tracking history for DHL No. 8649503052.

You have never responded to my October 9, 2007, October 22, 2007, or February 5, 2008 letters.

In addition to our above-mentioned efforts to contact you and obtain execution of the formal documents, we previously attempted to contact you by mail on November 8, 2006, November 22, 2006 and December 20, 2006. Moreover, we understand that the formal documents were given to you for your execution while you were still employed by Edwards "but...[you] refused to sign them and left them on...[your] desk upon departure" (See enclosed May 11, 2007 e-mail).

We request, once again, your cooperation in reviewing the documents and mailing them to us for receipt by no later than **March 13, 2008**. If I can be of any assistance to you, please do not hesitate to contact me.

Sincerely,

Kristi Nicholes, J.D.

Title: GEAR ASSEMBLY
Dkt. No. M04B101

Dear Mr. Davenne:

In following up with you, once again, regarding my correspondence of October 9, 2007, it has come to my attention that a page of the Declaration mailed to you on October 9th was inadvertently not included.

Accordingly, enclosed please find a copy of the above-referenced patent application for the invention of which you are a co-inventor. Also enclosed for your execution is (a) a complete inventor's Declaration to be signed (and dated) by you in blue ink; (b) an Assignment which you should sign on the same date that you sign (and date) the Declaration; and (c) a Power of Attorney and Correspondence Address Indication Form which you should also please sign and date.

Please review the application carefully and make sure that you agree with its contents prior to executing the Declaration.

If there are no changes to be made, please read the Declaration carefully, paying particular attention to the fact that, by signing the Declaration, you acknowledge the following:

- a) To the best of your knowledge, you are the first and true inventor of the subject matter of the patent application.
- b) You owe the highest duty of candor and good faith in your dealings with the Patent and Trademark Office, and in discharge of this duty, you must disclose to the Patent and Trademark Office any information of which you are aware that is "material to examination of this application" as defined in the attached 37 CFR § 1.56. Such information is material when, at least in part, there is a substantial likelihood that a patent examiner would consider it important in deciding whether the subject matter of the present application is patentable.

After these steps have been taken, please sign (and date) the Declaration.

The Assignment should be signed by you and witnessed at the same time that you sign and date the Declaration.

The Power of Attorney and Correspondence Address Indication Form should be signed and dated by you.

Please return the application copy with the signed Declaration, signed Assignment and signed Power of Attorney. The extra copy of the application is for your records.

§ 1.56

DUTY TO DISCLOSE INFORMATION MATERIAL TO PATENTABILITY. (Added 3/16/92)

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine: (Added 3/16/92)

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and (Added 3/16/92)
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentability defines, to make sure that any material information contained therein is disclosed to the Office. (Added 3/16/92)
- (b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and. (Added 3/16/92)

PATENT AND TRADEMARK CASES - RULES OF PRACTICE

- (1) It establishes, by itself or in combination with other information, a *prima facie* case of unpatentability of a claim; or (Added 3/16/92)
 - (2) It refutes, or is inconsistent with, a position the applicant takes in: (Added 3/16/92)
 - (i) Opposing an argument of unpatentability relied on by the Office, or (Added 3/16/92)
 - (ii) Asserting an argument of patentability. (Added 3/16/92)
- A *prima facie* case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability. (Added 3/16/92)
- (c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are: (Added 3/16/92)
- (1) Each inventor named in the application; (Added 3/16/92)
 - (2) Each attorney or agent who prepares or prosecutes the application; and (Added 3/16/92)
 - (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application. (Added 3/16/92)
 - (d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor. (Added 3/16/92)
 - (e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application. (Added 11/7/00)

WARNING:

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

DUTY TO DISCLOSE INFORMATION MATERIAL TO
PATENTABILITY. (Added 3/16/92)

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine: (Added 3/16/92)

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and (Added 3/16/92)
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentability defines, to make sure that any material information contained therein is disclosed to the Office. (Added 3/16/92)
- (b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and. (Added 3/16/92)

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or (Added 3/16/92)
- (2) It refutes, or is inconsistent with, a position the applicant takes in: (Added 3/16/92)
 - (i) Opposing an argument of unpatentability relied on by the Office, or (Added 3/16/92)
 - (ii) Asserting an argument of patentability. (Added 3/16/92)

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability. (Added 3/16/92)

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are: (Added 3/16/92)

- (1) Each inventor named in the application; (Added 3/16/92)
- (2) Each attorney or agent who prepares or prosecutes the application; and (Added 3/16/92)
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application. (Added 3/16/92)
- (d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor. (Added 3/16/92)
- (e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application. (Added 11/7/00)
